**Introduction**

The Funambol Palm Plug-in provides synchronization functionality for Palm mobile devices. After installing the software on your mobile device, you can synchronize contacts data on the device with that stored in enterprise data sources. This document described how to install, configure, and use the software.

**Prerequisites**

The system requirements for using the Funambol Palm Plug-in are as follows:

**Desktop or Portable Computer Used to Install the Plug-in on a Mobile Device**

- Palm Desktop corresponding to your Palm device.

For information on obtaining the Palm Desktop, see “Resources” on page 11.
Installation

The section provides details for obtaining, installing and configuring the software.

Obtaining the Software

The Funambol Palm Plug-in software is available as follows:

Download Site: www.funambol.com/opensource/downloads.html

File: funambol-palm-plugin-3.0.x.zip

Size: 50 KB

The file contains the following:

- Palm application file: funambol.prc
- License and readme files, and the release.properties file.

Installing the Software

Before proceeding, ensure that the Palm Desktop is installed on your desktop/portable computer. If a previous version of the plug-in is installed on the mobile device, you should uninstall that version before installing the current version.

1. Connect your Palm mobile device to the desktop/portable computer, e.g., via a USB cable.

2. Unzip the funambol-palm-plugin-3.0.x.zip file to a temporary directory. Extracting the file creates the following directory structure:
3. Move the **Funambol Palm Plug-in** folder to the `/plug-ins` directory of the Funambol home directory, as shown below:

![Diagram showing file structure]

4. Navigate to the `<FUNAMBOL_HOME>/plug-ins/Funambol Palm Plug-in` directory and click `funambol.prc`. This action starts the Install Tools component of the Palm Desktop, and displays the following dialog box:
5. Select the user of the mobile device connected to the computer and click **OK**. This action displays the following dialog box:

![Install Tool dialog box]

6. The Install Tool displays the user and application to be installed the next time you perform a HotSync operation. Click **Done**. This action displays the following dialog box:

![Install Tool dialog box]

7. Click **OK** to close the dialog box.

8. Perform a HotSync operation to transfer the application to your device.
Configuring the Plug-in

To configure the plug-in, perform the following:

1. On the Home screen of the mobile device, select Funambol. This action displays the Synchronization settings window.

2. Specify the following settings: Server URL, Username, Password, Address book remote name, and Log level, then click OK. For details, see “Synchronization Menu” on page 8.

Uninstalling the Software

To uninstall the plug-in from the mobile device, perform the following:

1. On the mobile device, go to the Home screen.

2. Click the time display in the upper left corner of the screen.

3. On the drop-down list, select Delete.

4. Locate and select the Funambol application (i.e., Funambol), using the scroll bar if necessary.

5. Click Delete.

6. Confirm the deletion of the application by clicking Yes.
Using the Funambol Palm Plug-in

This section describes the features of the Funambol Palm Plug-in.

Home Screen

When you start the Palm Plug-in, the following screen appears:

This screen provides the following functionality:

- **Main menu** – click **Funambol** in the upper left corner to access the main menu, which provides selections for synchronizing, specifying settings, and viewing a log file.

- **Synchronize button** – click to synchronize data using the current settings.
Main Menu Overview

The Funambol Palm Plug-in main menu contains the following selections:

<table>
<thead>
<tr>
<th>Selection</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Synchronization &gt; Settings</td>
<td>Displays a window for specifying synchronization settings.</td>
</tr>
<tr>
<td>Synchronization &gt; Synchronize</td>
<td>Synchronizes data using the current settings. This is the same as clicking the Synchronize button.</td>
</tr>
<tr>
<td>Help &gt; View log</td>
<td>Displays the contents of the log file.</td>
</tr>
<tr>
<td>Help &gt; About</td>
<td>Displays the version number the plug-in.</td>
</tr>
</tbody>
</table>
Synchronization Menu

The Synchronization > Synchronize selection performs a synchronization using the current settings. The Synchronization > Settings selection displays the following window:

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Server URL</td>
<td>The URL of the synchronization server.</td>
</tr>
<tr>
<td>Username</td>
<td>The user ID used to access the database associated with the synchronization server.</td>
</tr>
<tr>
<td>Password</td>
<td>The password used to access the database associated with the synchronization server.</td>
</tr>
</tbody>
</table>
| Address book remote name     | String that represents the contacts synchronization source (i.e., the URI) on the server. The following strings are valid:  
  • scard – SIF                                                                  |
| Log level                    | Specifies the type of data stored in the log file. Select one of the following:  
  • none (far left) – No data stored in the log file.  
  • info (center) – Informational data stored in the log file.  
  • all (far right) – Debug data stored in the log file.  
  When set to info or all, the file contains the log only for the last synchronization. |

Click OK to save the settings; click Cancel to close the window without changes.
Help Menu

You use the Help menu to access the following:

- **View log** – displays the log file.
- **About** – displays information about the software.

View log

You access the log file by selecting **Help > View log**, as shown below:
About

You access information about the software by selecting **Help > About**, as shown below:
